

B520-PRO-AS

ANTISCALANT EFFECT

High-capacity CarbFiber prefilter cartridge with antiscalant effect

Key Benefits:

- Provides effective antiscalant protection for reverse osmosis systems with a nominal permeate flow of up to 500 liters per hour
- Features AQUAPHOR's patented CarbFiber technology to provide both prefiltration and fine filtration
- Microfiber coat removes rust, colloidal iron, sand, other visible pollutants down to 20 µm
- Carbon block removes chlorine, organic compounds, heavy metals, and other city water impurities down to 5 µm
- Extremely high capacity – 150 000 L

B520-PRO-AS cartridge is designed for AQUAPHOR Viking 20" Housing that features exceptional durability, corrosion resistance, and the ability to withstand high pressure drops

Max. recommended flow, liter per minute	Up to 25
Capacity, L	150 000
Max. recommended replacement rate	6 months
Carbon pore size	5 µm
Microfiber pore size	20 µm
